SAYED MOUSTAFA

Workforce Management Analyst | Data Analyst | AI-Assisted Automation

Dubai, UAE | +971 50 563 4778 | alsharif.me@gmail.com

PROFESSIONAL SUMMARY

Workforce Management (WFM) and Data Analyst with 14+ years of contact-centre experience at e& (Etisalat) UAE, Vodafone Egypt and Raya CX. Specialized in real-time monitoring (RTM), forecasting, capacity planning, scheduling and KPI reporting using SQL, Power BI, Python and Advanced Excel/VBA. Creator of UMA, a real-time workforce monitoring application built for the e& contact centre using AI-assisted development and prompt engineering. Built automation tools officially adopted by e& that cut reporting time from minutes to seconds. Delivers executive reports to senior managers and SVPs that drive staffing and service-level decisions.

SKILLS

- **Workforce Management:** Real-Time Monitoring (RTM), Intraday Management, Forecasting (short- and long-term), Capacity Planning, FTE and Shrinkage Analysis, Scheduling, Service Level, AHT and Occupancy Analysis, Staffing Optimization
- **Data Analysis and BI:** SQL (SQL Server), Power BI (DAX, Power Query), Dashboard Development, KPI Development, Statistical Analysis, Trend Analysis, Data Validation, ETL, Data Integration, Data Modeling
- **Programming:** Python (data analysis, scripting, web scraping), Advanced Excel and VBA, JavaScript, Node.js, HTML/CSS, Playwright (automated testing)
- **AI and Automation:** AI-Assisted Software Development (Claude Code, ChatGPT), Prompt Engineering, Generative AI, LLM Agents and RAG concepts, Process Automation, Automated Reporting and Email Alerts
- **Platforms:** Genesys, QPC, Microsoft Excel, Power BI, Microsoft Outlook, SQL Server
- **Professional:** Data Storytelling, Executive Reporting, Stakeholder Management, Cross-Functional Collaboration, Process Optimization, Business Planning

PROFESSIONAL EXPERIENCE

Workforce Analyst | e& (Etisalat) UAE

Dubai, UAE | 06/2021 - Present

- Designed and built UMA, a real-time workforce monitoring application for the e& contact centre that integrates Genesys and QPC data to track queues, service levels, calls waiting and staff status across Voice and Non-Voice channels.
- Built an automation system that delivers analysis for all Lines of Business (LOBs), improving forecast accuracy and cutting processing time from 10 minutes to 8 seconds.
- Developed a real-time monitoring and reporting solution that reduced process duration from 4 minutes to 6 seconds and improved operational efficiency across multiple departments.
- Implemented an automated email notification system that sends critical updates to 15+ LOBs within seconds.
- Designed dynamic Power BI KPI dashboards that track performance indicators across departments.
- Analyze large workforce datasets to find trends and deliver insights to senior managers and SVPs.
- Run data validation and integrity checks to keep reports 100% accurate and reliable.
- Use AI-assisted development (Claude Code) and structured prompt engineering to design, build, test and release internal tools faster.

MIS Analyst | e& (Etisalat) UAE

Dubai, UAE | 02/2019 - 06/2021

- Analyzed operational data and produced regular reports and dashboards to support business decisions.
- Developed customized reporting tools that reduced manual work and improved report turnaround.
- Designed, maintained and optimized databases and data warehouses for reporting.
- Ensured data accuracy and consistency across all MIS reports.

Data Analyst | Vodafone Egypt

Cairo, Egypt | 07/2015 - 02/2019

- Analyzed customer data to identify trends and patterns that improved customer satisfaction and retention.
- Designed dynamic KPI dashboards with Excel and VBA automation to track business metrics across departments.
- Worked with cross-functional teams to implement data-driven strategies and improve business processes.
- Provided ad-hoc analytical support to solve complex business challenges.
- Applied statistical methods and data validation checks to keep reports accurate and reliable.

Workforce Coordinator | Raya CX

Cairo, Egypt | 03/2012 - 07/2015

- Forecasted staffing needs and optimized resource allocation using workforce data.
- Built an ETL data integration process that combined multiple data sources into one dataset, improving analytics and data access.
- Automated schedule swap requests, break management and offline activity updates, improving employee satisfaction.
- Developed optimized scheduling strategies that improved operational efficiency and reduced operating costs.
- Created performance metrics to measure workforce productivity and supported business continuity plans for peak periods.

KEY PROJECT

UMA - Real-Time Workforce Monitoring Application | e& UAE | 2026

Tech: JavaScript, Node.js, HTML/CSS, Excel/CSV data pipelines, Playwright, AI-assisted development (Claude Code)

- Built a desktop real-time monitoring (RTM) dashboard end to end: live KPI cards, site, section and LOB views, calls waiting, real-time staff status and STF variance.
- Ingests Genesys, QPC and weekly IDP data (Excel/CSV) through a configurable data adapter with layout health checks and reference queue mapping.
- Added one-click Outlook email reports per section with configurable alert and colour rules.
- Built an admin Control Panel with encrypted settings, user access control, version enforcement and a configurable calculation engine with live preview.
- Shipped 29 versions through fast iterative releases, protected by automated Playwright regression tests.
- Roadmap: AI assistant using RAG over historical WFM data, forecast, capacity plan and schedule designers, and an automated Genesys/QPC data grabber.

EDUCATION

Bachelor's Degree in Languages and Simultaneous Interpretation

Egypt | 07/2012
